SUMMARY

BE Information Technology graduate (Mumbai University, 2026) with a strong foundation in Core Java, Advanced Java (Servlets, JSP, JDBC) and SQL. Skilled in object-oriented programming, building database-driven Java applications, and writing efficient SQL queries. Eager to contribute as a Java Developer, write clean and maintainable code, and grow in a collaborative team environment. Seeking a Java Software Developer role to apply and strengthen backend development skills in a production environment.

TECHNICAL SKILLS

- **Core Java:** OOP (Encapsulation, Inheritance, Polymorphism, Abstraction), Strings, Collections Framework, Exception Handling, Multithreading.
- **Advanced Java:** JDBC, Servlets, JSP, Spring Framework, Spring Boot, Spring Security, Spring Data JPA, Hibernate.
- **RESTful API:** REST API development, JSON, Postman
- **Frontend Technologies:** HTML, CSS, JavaScript
- **Database:** SQL, PostgreSQL, Joins, Subqueries, Constraints, Normalization
- **Platforms:** Eclipse, VS Code, SQL Workbench, Git, GitHub

PROJECTS

ShowTime – Movie Ticket Booking System | *Java | Spring Boot | Spring Security | Hibernate | PostgreSQL*

- Developed a RESTful backend application using Java, Spring Boot, Spring Data JPA, Hibernate, and PostgreSQL.
- Designed and implement 10+ REST APIs to manage movies, theatres, screens, shows, seats, and ticket bookings.
- Integrated Spring Security and JWT authentication with role-based authorization for Admin and Customer users.
- Implemented core booking functionalities, including seat availability management, ticket booking, booking cancellation, and DTO-based data transfer using Model Mapper.

Employee Management System | *Core Java, JDBC, SQL, OOP*

- Developed a database-driven employee management application using Core Java, JDBC, SQL, and object-oriented programming principles.
- Implemented CRUD operations to add, update, delete, and retrieve employee records from a relational database.
- Applied OOP concepts such as encapsulation, inheritance, and abstraction to build modular and maintainable application components.

Deep Learning Model for Content Recognition of News Images and Videos | *Python, Deep Learning, CNN, RNN*

- Developed a deep learning-based system to recognize and analyze content from uploaded news images and videos.
- Implemented CNN-based image analysis and RNN-based video analysis to identify and classify visual content.
- Integrated image preprocessing, video frame extraction, visual search, and automated summary generation to support efficient news content analysis.

INTERNSHIPS & TRAINING

Java Full Stack Development Intern – QSpiders, Vasai December 2025 – June 2026

- Build REST APIs and database driven applications during a 6-month Java Full Stack Development internship program covering Core Java, Advanced Java, Web Technologies, SQL, Spring Boot, Hibernate, and Aptitude.
- Gained technical training in Java application development, backend development, database management, and full-stack development concepts.

EDUCATION

Theem College Of Engineering, Mumbai University 2022 – 2026
Bachelor of Engineering — Information Technology |CGPA :7.87/10

Jawahar Navodaya Vidyalaya, Ratnagiri, CBSE 2020 – 2022
Higher Secondary Certificate (Science) / Percentage: 74.20%

CERTIFICATIONS

- QSpiders, Vasai-Virar – Java Full Stack Development Internship (6 Months)
- Apna College – Delta: Full Stack Web Development Certification
- Edunet Foundation – Advanced Course on Green Skills and Artificial Intelligence (Skills4Future Program)
